

RECRUITMENT CASE STUDY

LISTGROVE

INTERNATIONAL RECRUITMENT & HUMAN RESOURCES
PERFORMANCE THROUGH PEOPLE

Listgrove supports leading UK recycling business to recruit an Operations Manager.

Enva Plastics specialises in recycling Polystyrene, Polypropylene and ABS which is taken from small house hold appliances (WEEE). They provide high quality compounds and polymers which are used in many plastic conversion sectors.

Responsible for supporting the new Managing Director, Listgrove was selected to recruit an Operations Manager by identifying and assessing applicants, that demonstrated experience within the plastics and/or recycling markets.

Having achieved much success in gaining interest in this brief, Listgrove engaged a comprehensive assessment process, which ultimately identified a highly skilled shortlist of applicants. Enva was able to make an informed selection from those submitted, without any impact on day to day operations.

Listgrove have worked with Enva Plastics on several occasions successfully sourcing a range of roles including; a Quality Control Manager, a Polymer Sales Manager and the Operations Manager.

“Listgrove’s ability to identify and attract talent, is the result of their extensive network, talent pipeline and understanding of the market. Throughout the process, I was really impressed with the communication, the timeframe and their professional approach and I would recommend Listgrove without hesitation”.

Client testimonial – Managing Director

“The recruitment process was very simple and straightforward. Listgrove’s experience left me with no complaints and if needed in the future, I would use again or recommend to anyone else.”

Candidate testimonial

For in excess of 15 years, Jason has operated in a commercial and excels in all aspects of customer care, business development and project management. His thorough management of projects has enabled success in appointing highly skilled individuals across Europe and North America, supporting clients in most industrial sectors. Jason offers particular expertise across plastic processing, equipment, and tooling fields.
